EDUCATION

Universitas Indonesia, Faculty of Engineering **2026 – Present**
Master of Engineering (M.Eng.) in Electrical Engineering

Telkom University, Faculty of Electrical Engineering **2021 – Nov 2025**
B.Eng. in Computer Engineering

- Cum Laude Graduate, GPA 3.61/4.00
- Endowment Fund Scholarship Recipient

PROFESSIONAL EXPERIENCE

PT. Meindo Elang Indah (EPC Oil & Gas Company) **Jakarta, Indonesia**
IT Developer *Aug 2025 – Jul 2026*

- Contributed to the development of a new Web QR Inventory sub-system, assisting in building HTML-based user interfaces and data integration for streamlined asset tracking.
- Updated the company's main web landing page, ensuring modern UI layout alignment, optimal responsiveness, and cross-browser compatibility.
- Maintained technical documentation and configuration records, supporting operational continuity and audit readiness.

The East Jakarta Tax Office (Government Office) **Jakarta, Indonesia**
Software Engineer *Jun 2024 – Sep 2024*

- Engineered a web-based document archiving system (PHP, MySQL), streamlining internal retrieval workflows for government records.
- Validated and verified tax records across 15+ categories of official documents, ensuring dataset accuracy for regulatory recordkeeping.

LEADERSHIP & KEY PROJECTS

Leadership Experience

Laboratory Assistant — SECULAB Cybersecurity Lab, Telkom University **Jun 2024 – Jun 2025**

- Spearheaded day-to-day cybersecurity lab operations and mentored more 20+ students during practical sessions, contributing to hands-on technical training.

Guest Speaker — PKKMB University Orientation, Telkom University **Sep 2024**

- Delivered an orientation address to 300+ incoming freshmen, presenting institutional and academic guidance to a large-scale audience.

Key Projects

IoT Delivery Robot T.I.F.A — Bachelor Thesis **2025**

- Conceptualized and engineered an end-to-end embedded system as Full-Stack IoT & Embedded Engineer, integrating multi-sensor arrays, closed-loop control, and real-time monitoring dashboards across mobile and web platforms.
- Developed Arduino/ESP32 firmware (IR & voltage sensors), a Kotlin Android app with 3-table multi-destination routing, and a Node.js/Vue.js fleet dashboard with real-time battery alerts.
- Validated system via UAT at Tel-U Coffee, boosting peak-hour service capacity by 40% with a 90%+ user satisfaction score.

Blockchain E-Voting Web Application **2024**

- Spearheaded development of smart contracts for secure electronic voting, validated with 30 test users, and built a full frontend integrated with a local Ethereum blockchain network.

Bali Elevation Modeling **2024**

- Conducted high-precision terrain analysis for elevation modeling, with findings supporting an academic publication draft.

SKILLS & LANGUAGES

Technical Skills: Python, JavaScript, C, Kotlin, SQL, Bash, Docker (basic), Git/GitHub
Tools & Platforms: VS Code, ETAP, PVsyst, MATLAB
Core Competencies: IoT Integration, System Monitoring, Technical Documentation, Code Review
Languages: Bahasa Indonesia (Native); English (Professional Working Proficiency, TOEFL PBT 507)
